SUMMARY

Senior Software Developer with 5+ years of professional experience designing, developing, and deploying scalable SaaS and EHR applications using Angular, ASP.NET Core, C#, TypeScript, JavaScript, HTML/CSS, and PostgreSQL. Proven expertise in building robust RESTful APIs, microservices, and event-driven architectures (SOA) with strong OOP and design patterns. Experienced in mentoring teams, optimizing performance, and driving architecture decisions for high-availability, maintainable systems.

SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML/CSS, React

Backend & Frameworks: ASP.NET Core, C#, .NET, Spring Boot, Java

Web Services & API Development: RESTful APIs, SOAP, Swagger/OpenAPI, JSON, OData

Databases: PostgreSQL, MySQL, Oracle, MongoDB, SQL, PL/SQL

Architecture & Messaging: Microservices, SOA, Event-Driven Architecture, Message Queues

Cloud & DevOps: AWS (EC2, S3, ECS, Lambda, API Gateway), Docker, Jenkins, CI/CD

Testing & Code Quality: JUnit, Mockito, Testcontainers, TDD, SonarQube, xUnit, NUnit

Tools & Methodologies: Git, Bitbucket, Maven, Postman, Jira, Confluence, Agile/Scrum

Design & Principles: OOP, Design Patterns (Singleton, Factory, Observer, DI), SOLID, DDD

Mentoring & Collaboration: Code Reviews, Pair Programming, Technical Mentoring, Agile Ceremonies

WORK EXPERIENCE

Senior Software Developer

March 2025 – Present

State Compensation Insurance Fund (SCIF)

- Architected and developed scalable SaaS-based claims management features using Angular, ASP.NET Core, C#, and PostgreSQL, enhancing real-time data processing and user experience.
- Designed and implemented event-driven services and RESTful APIs using ASP.NET Core, integrating with legacy systems and third-party EHR platforms for seamless claim data exchange.
- Leveraged TypeScript and Angular to build responsive, maintainable frontend components, improving internal dashboard performance by 30%.
- Mentored 3 junior developers through code reviews, pair programming sessions, and design discussions, fostering a culture of continuous improvement and knowledge sharing.
- Optimized relational database queries and indexing strategies in PostgreSQL, reducing report generation time by 40% and supporting high-volume workloads.
- Contributed to architecture decisions around performance, reliability, and maintainability, adopting event-driven patterns (Azure Service Bus) and SOA principles.
- Implemented CI/CD pipelines using Jenkins and Docker for automated testing (xUnit, NUnit) and deployment to AWS, ensuring reliable releases every sprint.

Senior Software Developer

Jan 2023 – Jan 2024

Harland Medical Systems, Inc.

- Led the migration of a monolithic medical device coating tracking system to a modular, event-driven architecture using ASP.NET Core and C#, improving system scalability and maintainability.
- Developed Angular-based user interfaces with TypeScript and HTML/CSS, enabling real-time visualization of coating parameters and compliance data.
- Designed and documented RESTful APIs with OpenAPI/Swagger, ensuring robust error handling and versioning for internal and external SaaS integrations.
- Optimized PostgreSQL database performance through complex SQL queries, indexing, and denormalization, cutting average API response time by 50%.
- Integrated AWS Lambda functions for asynchronous processing of compliance documents, following event-driven patterns to reduce operational overhead.
- Mentored team members on OOP principles, design patterns, and clean code practices, resulting in a 20% reduction in code defects.

Software Developer

Sep 2021 – Jan 2023

Mastercard

- Built and maintained scalable financial analytics features using Angular, ASP.NET Core, and PostgreSQL, serving global payment data to enterprise clients.
- Designed event-driven microservices with C# and .NET Core, leveraging message queuing for high-throughput transaction processing.
- Enhanced API performance and reliability by applying design patterns (Repository, Unit of Work) and optimizing relational database queries.
- Authored comprehensive unit and integration tests using xUnit and Moq, achieving 90%+ code coverage and ensuring system stability.
- Participated in architecture review boards, contributing to decisions on cloud-native, event-driven solutions that improved system resilience.
- Actively mentored interns and new hires, conducting technical sessions on TypeScript, Angular, and .NET Core best practices.

Software Developer

May 2020 – Sep 2021

Wipro

- Developed backend services using C# and ASP.NET Core for internal administrative tools, implementing RESTful APIs with strong OOP and design patterns.
- Migrated legacy SOAP services to modern RESTful APIs, adopting SOA principles and improving system interoperability.
- Created responsive HTML/CSS frontends using Angular and TypeScript, integrating with backend services for real-time data retrieval.
- Optimized SQL Server and PostgreSQL queries, reducing database load during peak hours by implementing proper indexing and caching strategies.
- Mentored junior developers in Agile methodologies, code reviews, and test-driven development, fostering a collaborative team environment.

PROJECTS

Career Companion Backend System | Angular, TypeScript, ASP.NET Core, C#, PostgreSQL, RESTful APIs, Docker, AWS, I

- A backend system designed to automate resume tailoring based on job descriptions using Angular frontend, ASP.NET Core APIs, and PostgreSQL database. Employs event-driven architecture and machine learning for similarity scoring. Deployed on AWS with Docker containers.

EDUCATION

San Jose State University

Master of Science in Computer Software Engineering 2020

Sathyabama Institute of Science and Technology

Bachelor of Engineering in Computer Science and Engineering 2018

CERTIFICATIONS

AWS Certified Developer – Associate (Expected 2025)

Microsoft Certified: Azure Developer Associate (Planned)
